1. NATURE OF OPERATIONS

King's Bay Resources Corp. (formerly King's Bay Gold Corporation) ("King's Bay" or the "Company") was incorporated in Canada pursuant to the *Canada Business Corporations Act* on March 20, 1998, and is in the business of acquiring, exploring, developing and evaluating mineral resource properties. The Company is a public company listed on Tier 1 of the TSX Venture Exchange in Canada with the symbol "KBG". The Company's name change from King's Bay Gold Corporation to King's Bay Resources Corp. was approved by the TSX Venture Exchange on August 14, 2017.

The head office, principal address and registered and records office of the Company are located at Suite 1450 – 789 West Pender, Vancouver, BC, Canada, V6C 1H2.

2. GOING CONCERN

The Company has not generated any revenues and has incurred accumulated losses of \$19,149,122 (December 31, 2017 – \$18,585,895) since inception. As at September 30, 2018, the Company has working capital of \$594,103 (December 31, 2017 – \$29,938). These financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations.

The application of the going concern concept is dependent upon the Company's ability to satisfy its liabilities as they become due and to obtain the necessary financing to continue operations, the attainment of profitable mining operations or the receipt of proceeds from the disposition of its mineral property interests. Management is actively engaged in the review and due diligence on opportunities of merit in the mining sector and is seeking to raise the necessary capital to meet its funding requirements. The conditions described above, cast significant doubt as to the appropriateness of the use of the going concern assumption.

The Company is not expected to be profitable during the ensuing twelve months and therefore must rely on securing additional funds from either debt or equity financings for cash consideration. While the Company is expanding its best efforts to achieve the continued financing, there is no assurance that any such activity will generate sufficient funds for future operations.

3. BASIS OF PRESENTATION

Statement of Compliance

The condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), applicable to the presentation of interim financial statements, including IAS 34, Interim Financial Reporting.

Basis of Measurement

These financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair value, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

Approval of the Financial Statements

The financial statements of King's Bay Resources Corp. for the nine months ended September 30, 2018, were authorized for issue in accordance with a resolution of the directors on November 13, 2018.

Significant Accounting Judgments, Estimates and Assumptions

The preparation of these financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

Estimates and assumptions

In particular, information about significant areas of estimation uncertainty considered by management in preparing the financial statements includes:

- The recoverability of the carrying value of the exploration and evaluation assets is dependent on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest;
- The inputs used in assessing the recoverability of deferred tax assets to the extent that the deductible temporary differences will reverse in the foreseeable future and that the Company will have future taxable income;
- The assumptions and inputs used in the Black-Scholes pricing model to calculate the fair value of share based payments;

Management judgments

The critical judgments that the Company's management has made in the process of applying the Company's accounting policies from those involving estimations that have the most significant effect on the amounts recognized in the Company's financial statements are as follows:

- Economic recoverability and probability of future economic benefits of exploration, evaluation and development costs

Management has determined that exploratory drilling, evaluation, development and related costs incurred which have been capitalized are economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefit including geologic information, scoping and feasibility studies, accessible facilities, existing permits and life of mine plans.

- Going concern

Significant judgments used in the preparation of these financial statements include, but are not limited to those relating to the assessment of the Company's ability to continue as a going concern.

4. SIGNIFICANT ACCOUNTING POLICIES

The policies applied in these condensed interim financial statements are consistent with policies disclosed in Note 4 of the financial statements for the year ended December 31, 2017. These condensed interim financial statements should be read in conjunction with the Company's audited financial statements for the year ended December 31, 2017.

5. MARKETABLE SECURITIES

During the year ended December 31, 2016, the Company received 20,000 post-consolidated common shares and 20,000 post-consolidated share purchase warrants of Intact Gold Corporation (“Intact”) in accordance with the sale agreement of the Blackjack Property.

On February 23, 2017, the Company entered into an agreement with Destroismaisons CLM Holding Corporation (“CLM”) for the sale of the Menary Gold Project. In consideration, the Company received 15% of the issued and outstanding shares of CLM and recorded the investment at the expected return of \$100,000.

During the nine months ended September 30, 2018, the Company sold 20,000 shares of Intact for gross proceeds of \$3,360 and realized a loss on the sale of \$15,640. At September 30, 2018, there are nil shares remaining (December 31, 2017 - \$4,017 fair value for 20,000 shares) and the warrants have a value of \$nil (December 31, 2017 - \$2) as they have expired. The Company recognized an unrealized gain of \$14,998 on the investment during the nine months ended September 30, 2018 (September 30, 2017 - \$13,573 loss).

6. EXPLORATION AND EVALUATION ASSETS

Lynx Lake Copper-Cobalt Property

On October 27, 2016, the Company announced the acquisition of a 100% interest in the Lynx Lake Copper-Cobalt Property, consisting of 66 mineral claims encompassing 20 square kilometers, located in southern Labrador. In consideration, the Company will pay \$100,000 (\$40,000 paid) and issue 900,000 common shares to the vendors (200,000 shares with a fair value of \$22,000 and 300,000 shares with a fair value of \$28,500) in staged payments. There is a 1.5% Net Smelter Return (“NSR”) on future production payable to original vendors. During December 2016, the Company increased the size of the property to 959 claims by staking additional property. As the newly staked claims are considered to be in the area of influence, these claims are also covered by the NSR. The acquisition was accepted by the TSX Venture Exchange on January 20, 2017.

On September 21, 2018, the Company amended the agreement pursuant to which the Company agreed to issue 600,000 common shares in place of the making a cash payment of \$30,000, increasing the shares to be issued on the second anniversary of the agreement to 1,000,000 common shares.

See Note 13.

8. SHARE-BASED PAYMENTS

Options

The Company has a Stock Option Plan (the “Plan”) under which it is authorized to grant options to directors, officers, consultants or employees of the Company. At the Company’s Annual and Special General Meeting on October 17, 2018, the shareholders approved the “2018 Stock Option Plan”, and set the number of options granted under the Plan to not exceed 10% of the issued and outstanding shares. Options granted to employees vest fully on grant. Options issued to investor relations consultants vest in stages over 12 months with one quarter of the options vesting in any three month period.

On February 1, 2017, the Company granted 816,128 stock options priced at \$0.135, exercisable for a period of two years. On March 1, 2017, 200,000 of these options were exercised for gross proceeds of \$27,000.

On September 21, 2017, the Company granted 1,325,000 stock options priced at \$0.10, expiring in 5 years. Of the total granted, 825,000 were issued to directors and officers of the Company, 150,000 to an employee of the Company, and 350,000 were granted to the Company’s consultants.

On November 29, 2017, 500,000 stock options priced at \$0.075 were exercised for gross proceeds of \$37,500.

On December 1, 2017, 150,000 stock options priced at \$0.075 were exercised for gross proceeds of \$11,250.

During the year ended December 31, 2017, a total of 550,000 options priced at \$0.075 were cancelled due to the resignation of a director and a consultant during the year.

The following is a summary of movements in the number of share options outstanding and their related weighted average exercise prices under the Company’s stock option plan for the year ended December 31, 2017 and the nine months ended September 30, 2018:

9. RELATED PARTY TRANSACTIONS - continued

- a) Kevin Bottomley is the President, CEO, and a director

These transactions are in the normal course of operations and have been valued in these financial statements at the exchange amount which is the amount of consideration established and agreed to by the related parties. The amounts due are unsecured, non-interest bearing, and have no specific terms of repayment.

10. FINANCIAL RISK MANAGEMENT

The Company is exposed in varying degrees to a variety of financial instrument-related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

- (a) Credit risk

Credit risk is the risk of loss associated with a counter party's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to its cash balances. The Company manages its credit risk on bank deposits by holding deposits in high credit quality banking institutions in Canada.

- (b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. The Company ensures that there are sufficient funds to meet its short-term business requirements, taking into account its anticipated cash flows from operations and its holdings of cash.

Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding.

- (b) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has cash balances and is not exposed to any significant interest rate risk.

- (c) Capital management

Capital is comprised of the Company's shareholders' equity and any debt it may issue. As at September 30, 2018, the Company's shareholders' equity was \$1,066,244 (December 31, 2017 – \$573,720). The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support its operations and business development. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company has not generated any revenues and cash flows since its inception; therefore, the Company is dependent on external financing to fund its future intended business plan. The capital structure of the Company currently consists of working capital and shareholders' equity. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares through private placements. The Company is not subject to externally imposed capital requirements.

10. FINANCIAL RISK MANAGEMENT - continued

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

(d) Fair value

The fair value of the Company's financial assets and liabilities approximates the carrying amount.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The following is an analysis of the Company's financial assets measured at fair value as at September 30, 2018 and December 31, 2017:

	As at September 30, 2018		
	Level 1	Level 2	Level 3
Cash	\$ 608,553	\$ -	\$ -

11. COMMITMENTS

On January 1, 2016, the Company signed a Management Services Agreement with Zimtu Capital Corp. ("Zimtu") to provide management and administrative services at a rate of \$12,500 per month expiring November 30, 2016, and then renewed on December 1, 2016, for an additional twelve months. The agreement was subsequently renewed on December 1, 2017 for a further twelve months.

12. LIABILITY AND INCOME TAX EFFECT ON FLOW-THROUGH SHARES

Funds raised through the issuance of flow-through shares are required to be expended on qualified Canadian mineral exploration expenditures, as defined pursuant to Canadian income tax legislation. The flow-through gross proceeds, less the qualified expenditures made to date, represent the funds received from flow-through share issuances that have not been spent.

On July 14, 2017, the Company issued 530,000 shares on a flow-through basis at \$0.125 per share (see Note 7) for proceeds of \$66,250, and recognized a liability on flow-through shares of \$18,550. At December 31, 2017, the Company has incurred \$66,250 of qualified expenditures and the flow-through proceeds were renounced on December 31, 2017.
